

MEDICAL DIAGNOSTIC TEST CENTER

End-to-End ServiceNow Workflow

Workflow derived from the supplied 21-page ServiceNow implementation reference.

1. Overall Workflow

1 Portal Entry	2 Test Catalog	3 Select Test	4 Booking	5 Patient Details	6 Schedule	7 Payment	8 Done	9 My Appoi ntments	10 Test Com pletion	11 My Lab Reports
--------------------------	--------------------------	-------------------------	---------------------	-----------------------------	----------------------	---------------------	------------------	---------------------------------	----------------------------------	--------------------------------

Primary path: Portal Home → Medical Test Catalog → Test Selection → Appointment Booking → Patient Details → Schedule → Payment → Done → My Appointments → Test Completion → My Lab Reports

2. ServiceNow Data Layer

Table / Object	Role in workflow	Key fields visible in reference
PATIENT	Stores patient master information used during booking	Date of Birth, Last Name, Gender, Updates, Address, Created / Created by
DIAGNOSTIC TEST	Stores diagnostic test definitions and details	Test Duration, Description, Updates, Category
APPOINTMENT TABLE	Stores appointment transactions	Rejection Reason, Status, Created, Slot Time, Scheduled Date, Patient, Updated by
REPORT TABLE	Stores diagnostic report information	Report Date, Updated, Report Number, Verified By, Appointment, Sys ID, Patient, Created by

3. Functional Modules / Service Portal Components

Component	Purpose shown in reference
Medical Test Catalog	Displays available diagnostic tests, search/filter capability, availability, pricing, and Book Now actions.
Appointment Booking	Guides the patient through a multi-step booking process: Details → Schedule → Payment → Done.
My Appointments	Displays appointment history/status and provides access to appointment details or a new booking.
My Lab Reports	Provides access to diagnostic test reports/results.
Lab Reports page	Service portal page used to present report information.
Test Catalog page	Service portal page backing the test catalog experience.
Appointment Booking page	Service portal page backing the booking experience.
My Appointments page	Service portal page backing appointment tracking.

4. Detailed Booking Workflow

Step 1 — Discover: Patient lands on the Medical Diagnostic Test Center portal and sees search, My Bookings/My Appointments, and My Reports access.

Step 2 — Select Test: Patient searches or browses the Medical Test Catalog and chooses an available diagnostic test.

Step 3 — Start Booking: Patient clicks Book Now. The Appointment Booking widget presents the progress sequence.

Step 4 — Patient Details: Patient information is captured, including first name, last name, email, phone, date of birth, gender, and address.

Step 5 — Schedule: Patient selects the required appointment schedule/slot.

Step 6 — Payment: Patient proceeds through the payment stage shown in the booking stepper.

Step 7 — Done: Booking reaches the Done stage and the appointment record is stored.

Step 8 — Track: Patient opens My Appointments to see booking status and appointment details.

5. Automation / Business Rule Workflow

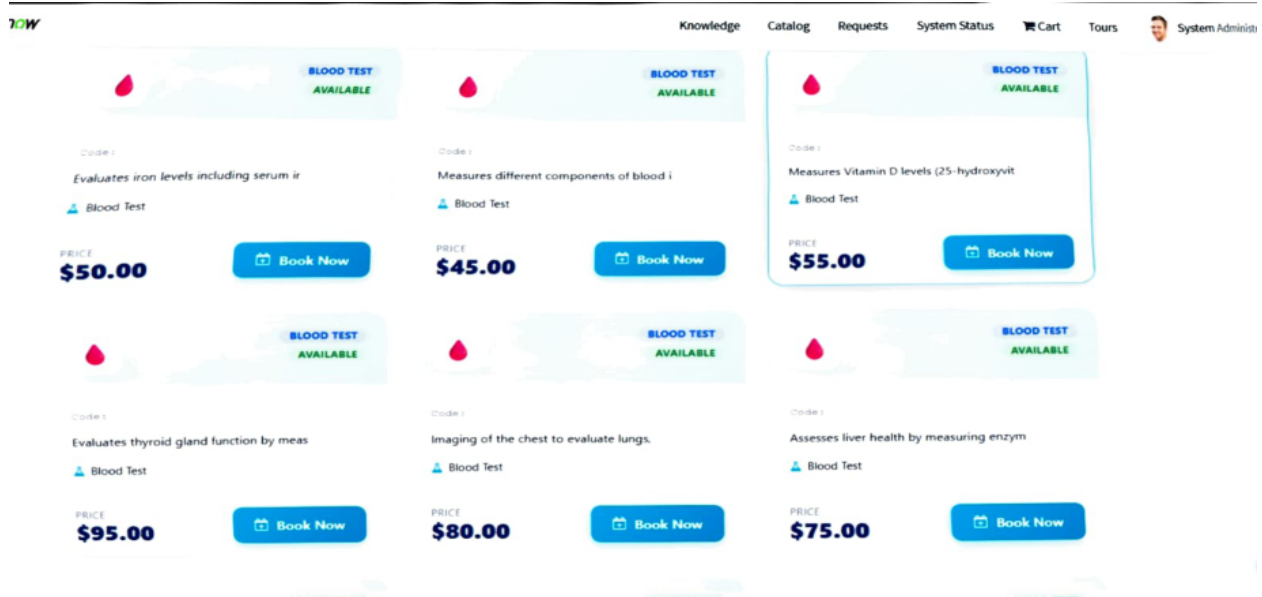

Automation	Trigger / configuration visible	Workflow outcome
Auto Populate Medical Appointment on Checkout	Business Rule on the APPOINTMENT TABLE; configured as an active rule and associated with the booking table.	Supports automatic population/creation of the medical appointment during checkout.
Auto Create Report on Appointment Complete	Business Rule on the APPOINTMENT TABLE; active; condition/action configuration shown.	Supports creation of a report when the appointment reaches completion.
rejectionTotalUpdate	Business Rule on the APPOINTMENT TABLE; active; update action and filter condition are shown.	Supports rejection-related update logic on appointment records.

6. End-to-End System Flow

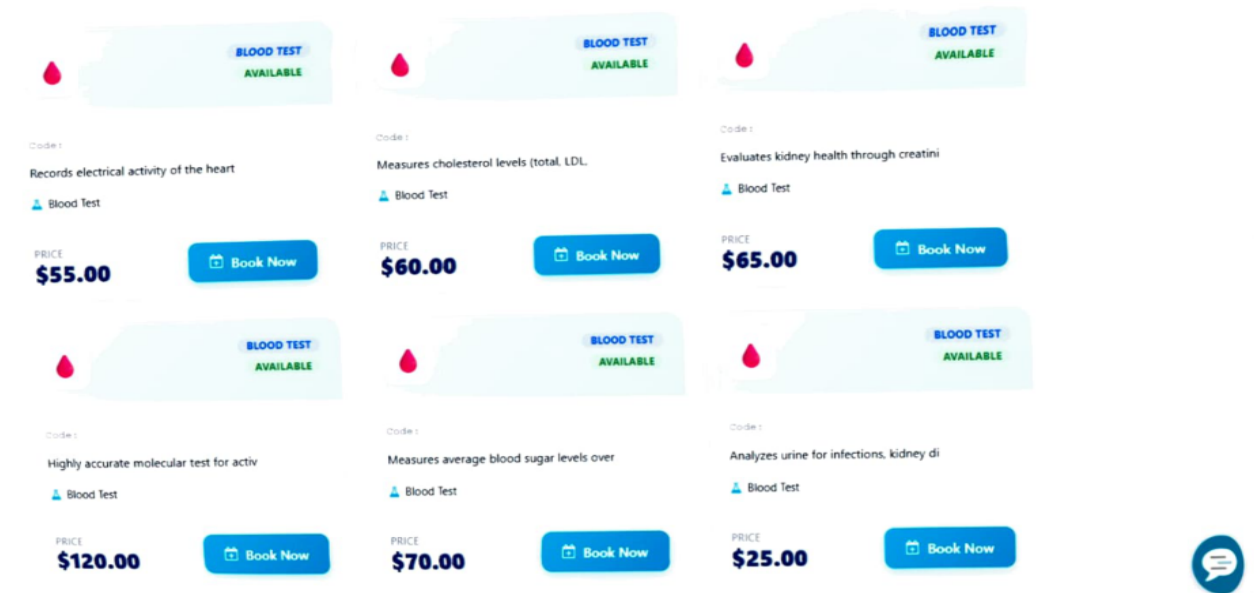

Stage	System Layer	Result
A	Portal Entry	Medical Diagnostic Test Center home page
B	Catalog	Search / browse diagnostic tests
C	Selection	Choose a test and click Book Now
D	Booking	Details → Schedule → Payment → Done
E	Appointment Record	Appointment stored in APPOINTMENT TABLE
F	Business Rules	Checkout / completion / rejection automation
G	Test Completion	Appointment reaches completion
H	Report	Report record is created / updated
I	Patient Access	My Lab Reports displays the report

My Appointments view — source page 19

Appointment booking — patient details stage — source page 20

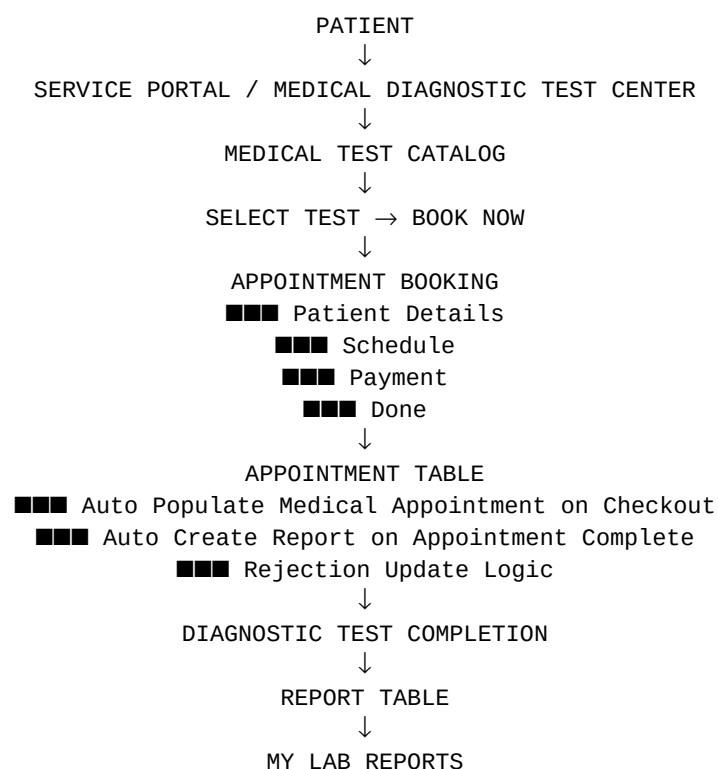

My Lab Reports page — source page 21

8. Implementation Summary

- The reference demonstrates a ServiceNow Medical Diagnostic Test Center built around portal widgets/pages, diagnostic-test data, patient data, appointment data, and report data.
- The patient-facing journey is centered on test discovery and appointment booking, followed by appointment tracking and report access.
- The booking experience is explicitly represented as four stages: Details, Schedule, Payment, and Done.
- Business rules are used to automate appointment/report/rejection-related processing around the APPOINTMENT TABLE.
- The workflow connects the patient-facing portal experience with the ServiceNow data and automation layer through the appointment lifecycle.
